COMPANY PROFILE

With a turnover which now exceeds £8m, and a solid focus on measurable service standards, we at Elite GB Environmental Services Ltd are proud of the reputation we have built within the industry for supplying the highest quality products and services.

We take social and corporate responsibility seriously, and undertake to constantly make ourselves aware of all current legislation regarding ethical work practices, avoiding landfill wherever possible.

Our teams are well trained and qualified to carry out our services to a standard that exceeds our customer's expectations, and our philosophies are carried by all personnel with genuine pride.

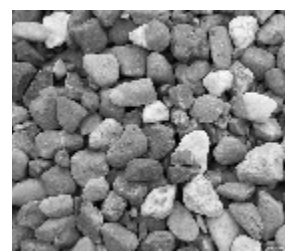

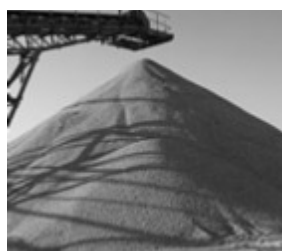

In an industry where so much is often overlooked in a bid to make savings, the option to cut corners as opposed to providing a service with integrity and honesty is never taken.

Ours is a business we are proud of.

HEATH & SAFETY

Elite GB Environmental Services Ltd is governed by a strict policy of Health and Safety, which sets out coherent regulations that determine the actions of the company, its Directors and members of staff, both on and off site.

This policy is available to our clients during negotiation, or can be downloaded from our website.

ENVIRONMENTAL SERVICES

With an ever growing need for environmentally sound services by all sectors of the construction industry, we provide dependable and cost effective solutions in the following areas.

LAND RESTORATION SERVICES

With many years of experience working on a wide range of projects, we at Elite GB Environmental Services Ltd can offer real expertise in the area of Land Restoration.

Our Land Restoration team will provide an initial evaluation and offer a broad scope of suggestions and options to fulfil any scale of project.

Services include:

Drainage System Evaluation
Materials Supply
Waste Removal
Planting and Seeding
Complete landscaping services

LAND REMEDIATION SERVICES

In today's environmentally aware world, remediation of land is important in all planning strategies.

Using highly effective techniques we offer specialist decontamination services which will greatly reduce the need for removal of materials.

Offering a total evaluation service, we aim to provide clients with a solution that is quick and cost effective, and give expert advice on contaminants at the site, environmental conditions, timescale and cost.

Depending on complexity, Land Remediation can have a dramatically positive impact on the comparable cost of removal and re-import of new material.

LAND TESTING SERVICES

Legislation requires that all construction sites must be put through a full and complete environmental evaluation before development of any kind is carried out.

Elite GB Environmental Services Ltd offer a comprehensive testing and sampling service in accordance with current regulations, which ensures our clients projects remain safely within legislative boundaries.

In association with UKAS accredited laboratories, testing for both physical and chemical properties is undertaken in complete accordance with current testing requirements, and upon completion our analysis is provided in report format, which will also outline our guidance for soil and material improvement if it is so required.

MUCK AWAY SERVICES

Avoiding landfill facilities wherever possible, Elite GB Environmental Services Ltd provide a dependable Muck Away and Disposal service to all sectors of the construction industry.

Following a thorough materials investigation, we can offer sound advice on the best possible practice to ensure legitimate disposal of all materials including inert, hazardous and special waste.

RUBBISH AWAY SERVICES

During construction projects it is inevitable that large scale volumes of general rubbish will be accumulated, and its quick removal can be an enormous advantage to ensuring a project is completed on time and on budget.

At Elite GB Environmental Services Ltd a core element of our business is in the removal and disposal of all site waste.

Following Government guidelines of avoiding landfill wherever it is possible, our aim is to responsibly recycle as many materials as possible through authorised waste recycling systems.
